NOVEMBER FEATURED PRODUCT TEXTURE STAINABLE ALUMINUM SDL BARS

FrontLine® Bldg Products is excited to introduce another great offering to our product mix!

At our Medford location we have been manufacturing SDL bars and other grilles for over 40 years. We are excited to introduce another great new product offering to our SDL line-up: **Textures Stainable Aluminum SDL Bars!**

The woodgrain texture is a non-descript texture that allows for integration of multiple species; Fir, Oak, Mahogany, Walnut and others. This innovative product can be either stained or painted

Textured Aluminum (Wood grained) SDL Bars are:

- Durable
- Temperature resistant with minimal expansion and contraction providing better adhesion
- 3M® VHB tape
- Will not chip or crack
- Cut, notched and end detailed for a quality fit and finish
- Easier to assemble and install than many of the SDL bars in market today
- Cost effective from both the material and labor side of the business
- Available in manufactured kits in various patterns, Lineal, 4 lite, 6 lite, 9 lite, 12, lite, 15 lite and custom
- Profiles
 - Profile 402 is an 1-1/8" Ogee
 - Profile 403 is an 1-1/8" Flat (putty)
 - Profile 810 is a 3-1/2" Flat (putty)

This product was featured by FrontLine® at last month's WMA convention in Mobile, AL. If you were unable to see or attend the show contact your FrontLine® representative for a hands-on experience with this fantastic new product.

You can also learn more by going to Facebook or LinkedIn to see the show booth, stainable SDL bar and other great FrontLine products.
