OCTOBER FEATURED PRODUCT COMPOSITE TRANSOMS

Did you know that FrontLine® now manufactures and offers a full composite transom? Both designed and engineered with FrontLine® Composite Components!

FrontLine® Bldg. Products introduced the composite door jamb material to our customers as an alternative jamb material back in 2015. Since then we have expanded our entire offering to include engineered mull posts that allow our door fabricators to build on a sill platform that is storm door applicable. Soon to follow was our composite pre-clad offering. Combining the longevity of composite material and durability and stability of our proprietary extruded aluminum cladding.

View Pre-Clad Door Frames

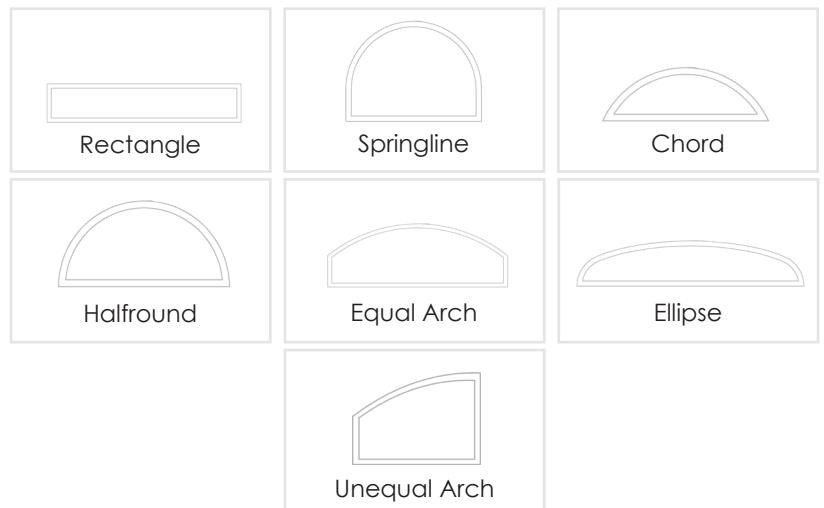

As always, FrontLine® Bldg. Products Inc. looks for the opportunity to create even more value to our customers. With our technology and engineering staff, FrontLine® Bldg Products Inc. is excited to be able to offer a complete line of composite transoms (Primed and Woodgrain) in rectangular and radius shapes. This composite transom program is a continuum of what we currently do with our wood and aluminum clad transom program.

This program offers all of the same features and benefits that our customers like about our current transom program.

- Easy to install
- Unlimited grille program – wood interior surround, GBG, SDL in various shapes and sizes
- Complete glass offering – from Clear Low E to Decorative in all shapes
- Glass forward design to meet the architectural detail of the home

Stop building transoms in your shop and using precious labor resources. FrontLine® has the specialists and the technology to build high quality transoms at a competitive price. Contact your FrontLine® Bldg. Products Inc. sales representative for more details.
